

Quality Policy

This policy applies to all Korvest Limited sites.

At Korvest we are committed to supplying quality, safe, and consistent products, which comply to legal requirements and meet the expectations of our customers.

This will be achieved through:

1. Compliance with regulatory obligations,
2. The application of Good Manufacturing Practices and meeting the standards of our customers and consumers.
3. A documented quality management system, which provides the framework to assess and control current and emerging quality issues accredited to ISO9001.
4. Developing and maintaining appropriate management and supervisory controls over all activities in the design, production, and supply of products.
5. Ensuring all employees are trained to the required level to ensure compliance with the standards and requirements of their role.
6. Empowering employees to have ownership of product quality.
7. Establishment and monitoring of key processes including vendor assurance, storage and handling, production and processing, product testing and product release.
8. Continuously improving our systems in response to changing regulations, industry practice and moving expectations of markets.
9. Regularly reviewing this policy and its effectiveness.

Our Quality Policy applies to all aspects of the organisation's supply chain. A process of continuous review and improvement ensures the relevance of the quality management system.
